
Advanced Technology & Innovation for the State of Georgia

Sherry Giddings

Director

Aerospace Innovation Center

Advanced Technology Development Center

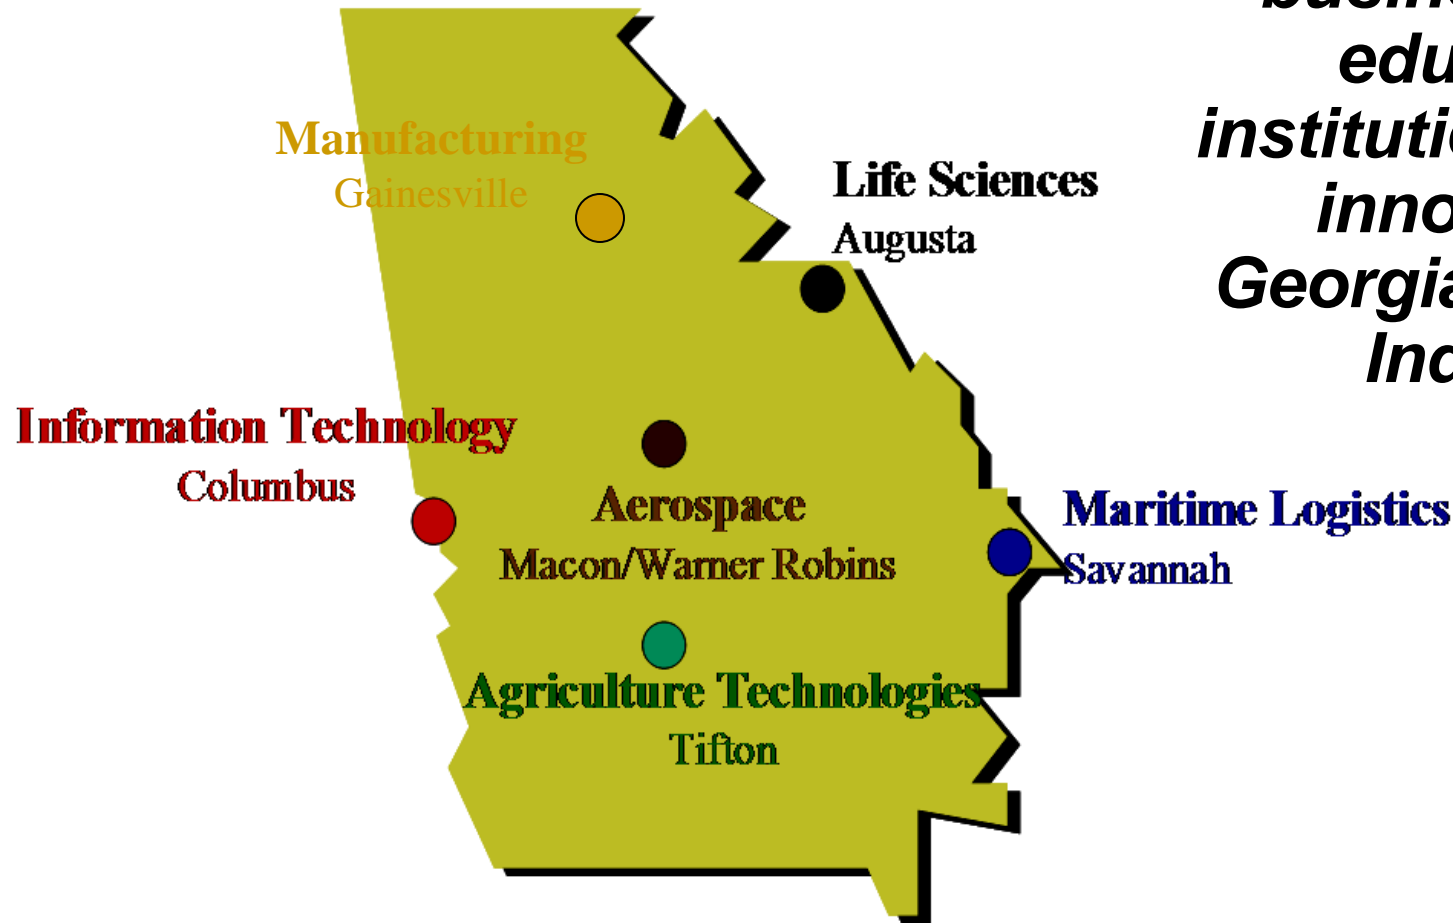

Synopsis

Learn about the Aerospace Innovation Center and it's mission to expand and nurture organizations through workforce development, collaboration, and R&D.

Mission

The catalyst for interaction among entrepreneurs, businesses, and educational institutions to foster innovation in Georgia's Strategic Industries

What is INNOVATION?

Something new or improved, having marketable potential, including

- (1) development of new technologies,
- (2) refinement of existing technologies, or
- (3) of new applications for existing technologies.

How do we do this?

- Collaboration
- Networking
- Research & Development
- Workforce Development
- Nurture (incubation)

Collaboration

- Partnering
- Networking
- Available resources
 - Research institutions
 - Co-op/internships
 - Economic development (state and local)
- Strategic planning
- Market research

Research & Development

- Industry driven
- Grant opportunities
 - Matching funds
 - Equipment
- SBIR assistance
- Professors, students, and facilities available for development and testing
- Licensing – technology transfer

Workforce Development

- Bridging the gap between education and industry
- Training
- Special needs
- Trends

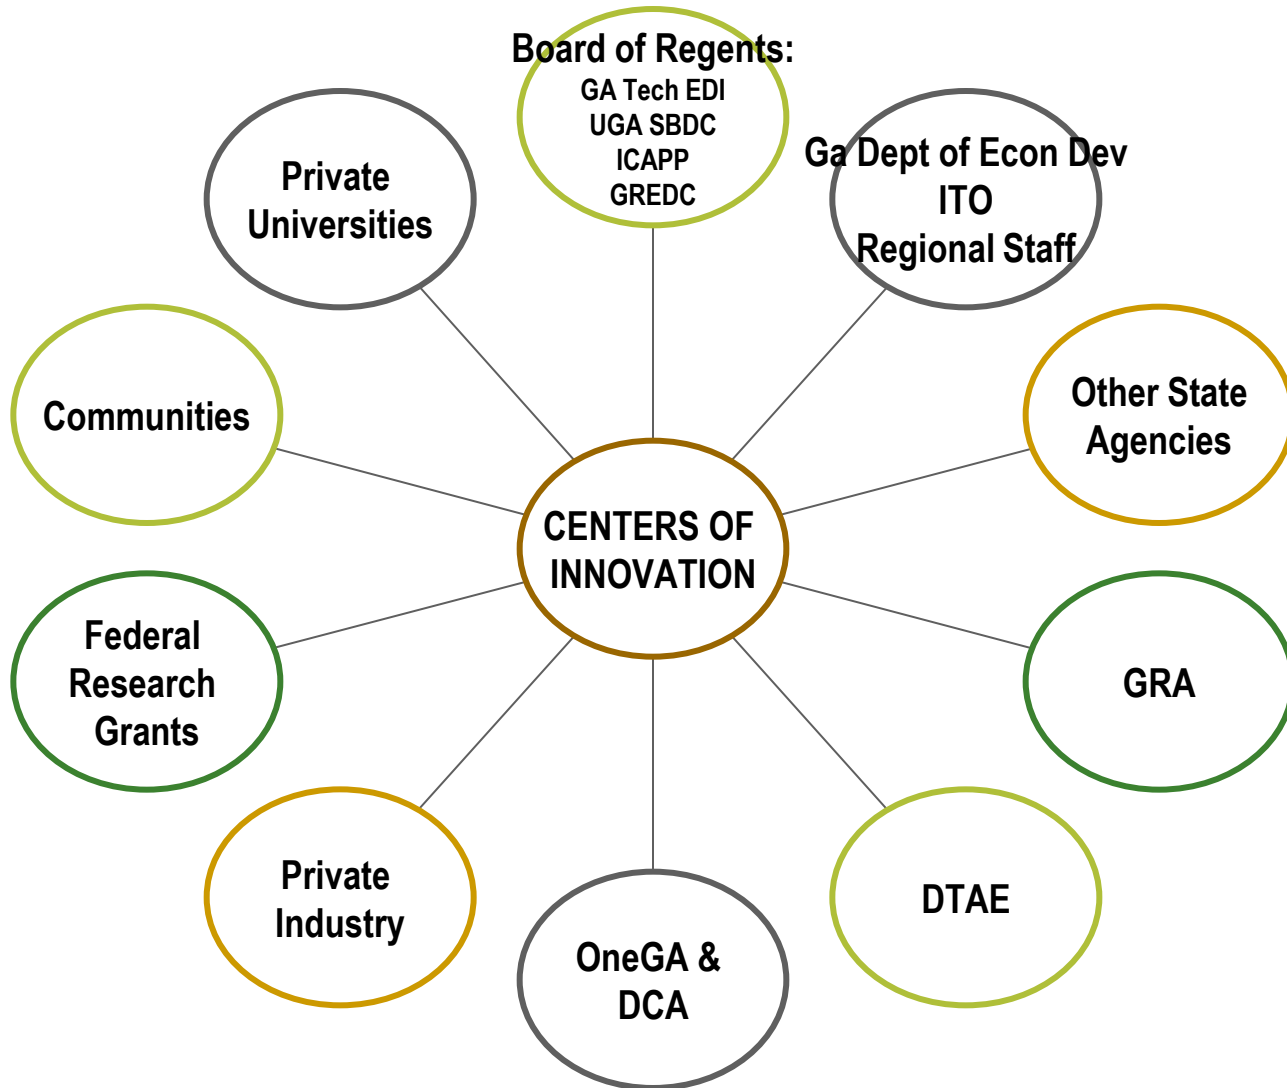

Nurture

- Incubation (ATDC)
- Mentoring
- Facilities
 - Incubation without walls
 - Entrepreneurial Outreach Specialist
- Resources
- Investment network

Bringing Everything Together

- Helping your organization grow to the next level
 - Increased revenue
 - Increased jobs
